PROFESSIONAL SUMMARY

Software engineer with a Master of Information Technology from UTS (Dean's List 2025 and 2026) and 1.5 years of commercial experience at Infosys, building enterprise web applications with Java, Spring Boot, Angular, and REST APIs. Works across the stack and the full development lifecycle, from requirements and specifications to front-end and back-end development, SQL data work, integration testing, and production defect investigation. Has also built a React web application, a native iOS app, a Unity game, and desktop applications in Python and C#. Currently a technical intern at Outcomex and an undergraduate tutor at UTS.

SKILLS

Languages: Java, Python, C#, JavaScript, TypeScript, SQL, Swift

Front End and Mobile: React, Angular, HTML5, CSS3, Zustand, SwiftUI, Xcode, Unity, Figma

Back End and Data: Spring Boot, REST APIs, object-oriented programming, SQL, PostgreSQL, relational database design, ER modelling

Delivery: Git, GitHub, Jira, Agile, SDLC, integration testing, defect investigation, root cause analysis, code review, technical documentation

AI-Assisted Development: Experienced using Claude and Claude Code to accelerate prototyping and debugging, and to ramp up quickly on unfamiliar languages and frameworks

EXPERIENCE

Technical Intern | Outcomex, Sydney

Jun 2026 - Present

- Identified a gap in project visibility and built an internal delivery observability dashboard from scratch, using serverless functions and Clockify API integration. Automated a manual process and gave stakeholders real-time RAG status visibility.
- Conducted horizon-scanning research on emerging technologies and turned findings into internal use cases. Building custom AI solutions for internal process improvements.
- Documented the managed services monthly reporting process in a Miro flowchart and wrote engagement guides for pre-sales staff. Take part in daily stand-ups across multiple delivery teams.

Academic Tutor | University of Technology Sydney, Sydney, NSW

Mar 2025 - Present

- Teach Programming on the Internet and Systems Testing and Quality Management, giving lab support on debugging, asynchronous programming and web applications, and marking assignments for 100+ students per semester.

Web Developer (Volunteer) | Pass To Me, Sydney, NSW

Feb 2025 - Present

- Revamped the company's Squarespace website, improving mobile responsiveness, accessibility, and navigation.

Peer Networker (Volunteer) | University of Technology Sydney, Sydney, NSW

Feb 2025

- Supported 100+ new students during Orientation, staffing help desks, resolving queries in real time, and leading campus tours.

iOS Developer | Apple Foundation Program, Sydney, NSW

Nov 2024

- Designed and built a SwiftUI-based iOS prototype in a cross-functional team of 5, presenting the solution to over 50 participants.

Senior Systems Associate | Infosys, Chennai, India

Dec 2021 - Jun 2023

- Developed and maintained enterprise web applications using Angular, Java, Spring Boot and REST APIs across the full software development lifecycle in Agile teams, integrating Angular front ends with Spring Boot services.
- Gathered business requirements and wrote functional specifications and design documentation.
- Investigated production defects, performed root cause analysis, and followed issues through to resolution, with integration testing, release support, and code review.
- Queried and validated customer data across SQL-based systems and Salesforce to support operational accuracy.

PROJECTS

The Misinformation Lab | React 19, Vite, Zustand, IEEE Metaverse Grand Challenge 2026

- Designed, built, and deployed a fully client-side media-literacy simulation with a rule-based AI strategist that names the manipulation tactic behind each rewrite and refuses requests naming real people or organisations. Optimised to 88 KB gzipped, with keyboard-complete screens.

Cap It Hot: Cafe Themed Game | Unity, C#, university coursework

- Built a team game in Unity with C# player controls, enemy logic, collision systems, and level progression. Selected as one of the best projects to present at UTS Tech Fest.

Style Mate: Sustainable Fashion iOS App | SwiftUI, Xcode, Figma, university coursework

- Developed an iOS app to catalog clothing and plan outfits, with responsive SwiftUI interfaces prototyped in Figma.

Student Enrolment System | Python, Tkinter, JSON, university coursework

- Built a modular Python desktop app for student enrolment and course registration, with JSON-based persistent storage.

Hospital Management System | C#, .NET, JSON, university coursework

- Built a console-based system in C# with role-based access for Patients, Doctors, and Administrators and JSON-based storage.

EDUCATION

Master of Information Technology | University of Technology Sydney

Jul 2024 - May 2026

Dean's List 2025 and 2026

Bachelor of Science: Information Technology and Management | Lady Doak College, India

Jun 2018 - Jun 2021

ADDITIONAL ACHIEVEMENTS

- International Workshop on AI Strategy, Poznan University of Technology, Poland (Apr 2026): selected to represent UTS; analysed real-world business cases in global teams.
- Completing the AI Application Developer and AI System Administrator Career Journeys on ServiceNow University.
- Certificate of Recognition, Lady Doak College (Jun 2021).

Languages: English and Tamil (fluent), Korean (intermediate).
